

# **WhitemarshUltraTree Website News and Updates**

## **May 22, 2024**

This website is a consequence of the merger of Enabling Simplicity, LLC into the Whitemarsh Information Systems Corporation.

All of our downloads are for those Ultra Tree users who have current Support Contracts. We are here to both offer support for these users, for Clarion users in general, and for a much wider IT audience who have a focus on Database, Data Management, Business Information Systems Architecture, and of Business Information System iterative development through the use of Clarion to accomplish real-live Prototyping.

As of this date we have uploaded for well over 200 Technical Support Papers and also Slide-deck Courses.

For Clarion UltraTree users we have also uploaded nearly 100 "Cheat Sheets" for both Ultra Tree implementation and also for Ultra Tree capability enhancements. These "Cheat Sheets" were created as we implemented the Whitemarsh Enterprise Management System, Metabase.
